

*** RDM-Workshop 1: File Naming + Organizing |**

September 28th, 2021, 10-12 am.

Using good names will improve reproducibility and reusability of your research project and is easy to do! File names should be machine readable, human readable and play well with default ordering. We will learn about how to be consistent and descriptive in naming and organizing files so that it is obvious where to find specific data and what the files contain.

*** RDM-Workshop 2: Metadata, Fairshairing + Vocabulary |**

October 5th, 2021, 10-12 am.

Data available has to be understood in order to be useful. Therefore we have to ensure that open datasets include consistent metadata (information about the data, so that the data is fully described). Because metadata standards are highly discipline specific, we will try to make an attempt to set a joint vocabulary and lay the groundwork for future collaborations in AUDICTIVE.

*** RDM-Workshop 3: Data reuse + Sharing |**

October 12th, 2021, 10-12 am.

Data management stimulates collaboration with others, allows you to always find your data and ensure the quality of scientific practice. We will learn how to capture, preserve and share data and code to ensure research is reproducible.
